github.com/payaljaiswalbdh

Summary

Software Developer with hands-on experience designing and deploying scalable full-stack web applications using Node.js, MySQL, and React.js. Proficient in architecting clean RESTful APIs and type-safe user interfaces with TypeScript and Tailwind CSS. Strong foundation in Data Structures & Algorithms and Computer Science fundamentals, with strong analytical and problem-solving skills.

Education

Bachelor of Technology in Computer Science and Engineering	2023 – 2027
Pranveer Singh Institute of Technology, Kanpur	CGPA: 8.32 (till 6th semester)
Intermediate (ISC)	2022
St. Mary's School, Bhadohi, Uttar Pradesh	Percentage: 82.8%
High School (ICSE)	2020
St. Mary's School, Bhadohi, Uttar Pradesh	Percentage: 76.16%

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, C
Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Node.js, Express.js, REST APIs, API Design & Documentation (Postman), JWT Authentication
Databases: MongoDB, MySQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks
Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Projects

- Cryptocurrency Simulator – Full-Stack Web Application** Ongoing
- Developed a risk-free cryptocurrency trading simulator supporting real-time buy/sell execution and dynamic portfolio tracking.
 - Integrated third-party market data APIs to display live candlestick updates, market trends, and asset distribution charts.
 - Architected modular backend services using Node.js, Express.js, and MongoDB/MySQL for transaction validation and history tracking.
- CogniBoard – AI-Native Visual Kanban Board** Jul 2026
- Built a full-stack Kanban board converting voice and text prompts into structured tasks using **Google Gemini 2.5 Flash**.
 - Implemented drag-and-drop workflow tracking with real-time board persistence and secure JWT authentication.
 - Engineered RESTful backend services using Node.js, Express.js, and MongoDB for state management and Gemini API handling.
- Revenue Pulse – Client Follow-Up & Payment Tracking CRM** Jan 2026 – Mar 2026
- Developed a full-stack MERN CRM to centralize client records, follow-up schedules, and pending payment lifecycles.
 - Built real-time interactive analytics dashboards displaying revenue milestones and customer engagement metrics.
 - Automated scheduled client reminders and payment notifications integrating **Twilio API** and **Nodemailer**.

Certifications & Achievements

- Solved **400+ coding problems** across LeetCode and HackerRank, demonstrating strong Data Structures and Algorithms skills
- Earned Salesforce Trailhead badges in **Artificial Intelligence Fundamentals** and **Generative AI Basics**
- Participated in GenAI Exchange Hackathon** – Google Cloud (H2S Program) – 2026
- Agentic AI Certified Foundations Associate** – Oracle University – 2026
